Adapted from the NIH COVID-19 Treatment Guidelines:

I. **Asymptomatic**
II. **Mild** – Various symptoms of COVID without shortness of breath, dyspnea, or abnormal chest imaging
III. **Moderate** – Evidence of lower respiratory disease by clinical assessment or imaging, and oxygen saturation of ≥94% on room air
IV. **Severe** – Respiratory frequency >30 breath per minute, oxygen saturation <94% on room air*, or lung infiltrates >50%
V. **Critical** – Respiratory failure, septic shock, and/or multiple organ failure
