Clinical severity of COVID cases diagnosed at UHS
2021-08-22 to 2021-12-18

Adapted from the NIH COVID-19 Treatment Guidelines:

I. **Asymptomatic**
   - Various symptoms of COVID without shortness of breath, dyspnea, or abnormal chest imaging

II. **Mild** – Various symptoms of COVID without shortness of breath, dyspnea, or abnormal chest imaging

III. **Moderate** – Evidence of lower respiratory disease by clinical assessment or imaging, and oxygen saturation of ≥94% on room air

IV. **Severe** – Respiratory frequency >30 breath per minute, oxygen saturation <94% on room air*, or lung infiltrates >50%

V. **Critical** – Respiratory failure, septic shock, and/or multiple organ failure
